

API EXPORT END USE STATEMENT INSTRUCTIONS

The below instructions will provide guidance on how to fill out the API Export Control Questionnaire and End Use Statement form so that we can classify the part properly and review if an export license is required or if an exemption may be able to be used.

- 1) Do not fill this out, API will complete once approved by Thomson Compliance.
- 2) Enter the API Internal Part # here
- 3) Enter your part # here.
- 4) API is shipping directly from the United States to the Buyer with this export sale. If the Buyer is going to reexport or retransfer the goods after this export sale, check “yes” here. If the Buyer is a direct consumer and not reexporting or retransferring will take place, then check “no” here.
- 5) List the API part being exported here,
- 6) List ALL parties and the addresses to this transaction for screening purposes, including brokers and 3rd parties involved in the transaction.
- 7) Describe the end use application for the part that you are buying from API. If the end use is a military aircraft, name the aircraft and model #. If the end use application is a tank, name the tank and model number. If the A & D application falls under a specific platform, name the platform. If the end use is a missile, name the platform and name of the missile. In the case of a missile also advise the payload and range capability of the missile. In the case when a missile can be on an aircraft or tank, state that. If the Thomson part will be integrated into a unit or part once purchased by the buyer, state that. The functionality of the API part in the end use must be noted here. For example: The actuator will function to open and close the door of an XX model tank, or XX model aircraft. For example: The actuator will act as the target system on the XX model aircraft that fires XX missile. **If the functionality of the API part is not noted the quote/sale will be rejected.**
- 8) The API part that you are purchasing has been specially designed for the end use application. As such, describe how the Thomson part is being developed to achieve or exceed the controlled performance levels, characteristics, or functions for the end use. For example: The modification of this part will help exceed the range of X missile to achieve the performance levels needed for X with any details possible to classify the part accordingly.
- 9) This section advises that if at any time you or any users in this transaction should change the parties or countries to the transaction that you must notify API in writing. Please read and initialize.
- 10) Please read through the following section so that you are aware of U.S. Export Controls and Regulations. When you have finished reading through this page, please go to # 11.
- 11) Write today’s date here.
- 12) You must be an Authorized Signatory for your company to fill out this form and sign it. Please print your Title here.
- 13) Please clearly print the Legal Entity Name of your Company here.

*Linear Motion. **Optimized.***

14) Please clearly print your full name here.

15) Sign and date this form.

Do not sign in the red area as Thomson Compliance will review the information you provided and approve or reject the End Use Statement. Thomson Compliance may reach out to you for additional questions.

Thank you.
